

INDEX

A-E

Alfalfa

- as salt-tolerant forage, Mar-23
- barrel medic markers help find genes in, Jan-23
- falcata subspecies of, Oct-8
- transgenic, protein preserved in, Dec-20

Animal disease research, Nov-4

Animal health, new *Cryptosporidium* species, Feb-23

Antioxidants, benefits of to eye health, Aug-4

Ants, parasitic, Feb-20

Apples

- dwarfing gene in, Nov-18
- fire blight, wooly apple aphid resistance in, Nov-18
- methyl jasmonate improves red color in, May-10
- native bacteria fights replant disease in, Jun-23
- wasp as control of tarnished plant bug on, May-11
- yeast fights blue mold on, Aug-17

Apricots, Apache variety added to genebank, Jun-8

Aquaculture

- liquid oxygen used in catfish harvest, Aug-8
- production, Jun-2, 4

ARS Collection of Entomopathogenic Fungal Cultures, Apr-8

ARS's 50th anniversary, Nov-2, 4

Avian influenza, new rapid test for, Feb-9

Bacteria, *Lactobacillus* strain to make mannitol, Mar-7

Barley, health benefits of eating, May-8

Barrel medic, genetic markers in, Jan-23

Basil, colored mulches improve qualities of, Sep-14

Beans

- disease resistance in, Jan-23, May-4
- ozone tolerance in snap beans, Jan-7

Bee

- artificial diet for aids almond pollination, Mar-12
- blue orchard, good pollinator of cherries, Jan-18

Berries, ARS breeding program for, Oct-4

Biocontrol agents, technologies to produce, Aug-22

Biocontrol

- of blue mold with yeast, Aug-17
- of glassy-winged sharpshooter, Sep-2, 18
- of imported fire ants, Feb-20
- of leaf spot disease with fungal enzyme, May-14
- of red and black imported fire ants, May-16
- of skunk vine with beetle, bug, Oct-16
- of tarnished plant bug with tiny wasp, May-11

Biotechnology risk assessment, Jan-2

Blackberry, new thornless cultivars of, Oct-4

Boll weevil eradication program, success of, Feb-2, 4

Bonsai, penjing at National Arboretum, Jun-12

Broccoli, downy mildew resistance in, Mar-23

Bt corn and monarch butterflies, Nov-4

Buffer strips, vegetative, Oct-2, Dec-4

Cacao trees, nine high-yielding varieties, Jul-23

Carbon sequestration high in golf courses, Jun-10

Carrots, colored mulch alters vitamin levels in, Sep-14

Catfish

- liquid oxygen used during harvest of, Aug-8
- preventing off-flavors in, Mar-15, Apr-21

Cattle

- balancing protein and nitrogen in, Jul-10
- calculating bulls' profitability, Apr-12
- feedlot runoff system recycles manure of, Apr-18
- genetic sequencing of disease microbes in, Apr-19
- ultrasound reveals fat and marbling in, Apr-6
- vitamin D as meat tenderizer, Jul-18

Cherry, blue orchard bee great pollinator of, Jan-18

Chickens

- bacteria levels on featherless skin, May-23
- test for avian flu in, Feb-9
- vaccine reduces *Salmonella* shedding by, May-7

Chickpea, Sierra variety resists blight, Oct-23

Citrus, three better rootstocks for, Dec-11

Clean Water Act, compliance with, Dec-12

Community Nutrition Mapping Project, Apr-16

Composting, managing animal-waste with, Aug-20

Computer model predicts pesticide movement, Jul-14

Computer program ranks bulls' profitability, Apr-12

Conservation buffers, Dec-2, 4

Conservation tillage

- raises Old Rotation cotton yield, May-19
- strip-tillage benefits soil, May-22

Consumer product development, Nov-4

Corn rootworm, two controls for, Jan-4

Corn,

- benefits of new high-oleic varieties of, Aug-18
- Bt*, mixing seed of with non-*Bt* seed, Jan-4
- increasing bioavailable iron in, Apr-14
- iodine-based fungicide for seed, Jan-19
- YieldGard Rootworm variety, Jan-4

Cotton

- boll weevil eradication program, Feb-2, 4
- deep tillage in Old Rotation experiment, May-19
- more efficient lint cleaner for, Sep-19
- new uses for gin waste, Nov-23
- reflected far-red light elongates fibers in, Sep-14
- ultrasound speeds enzymatic treatment of, Feb-10
- wound-healing bandages made of, Jan-14

Cows, determining fertility in, Apr-4

Crickets, Mormon, tracking, Apr-23

Crop research, Nov-4

Crops, genetic engineering of, Jan-2

Cryptosporidium canis identified, Feb-23

Diabetes, effect of exercise in Hispanics with, Apr-20

Dietary Guidelines, role of in human nutrition, Mar-2

Elm trees, phytoplasma causes disease in, Jan-18

Environmental health

- activated carbons from poultry litter, Aug-23
- agricultural water management, Aug-16
- BARC farm research benefits, Oct-2, 12
- cleaning groundwater with vegetable oil, Jan-23
- composted manure is better for, Aug-20
- conservation buffers, three-zone, Dec-2, 4
- frog malformations, Jan-20
- monitoring effects of feedlots on, Jul-10
- radio wave heating for pest control, Feb-15
- recycling feedlot runoff, Apr-18
- ultrasound use in cotton processing, Feb-10
- wood chips curb nitrate loss from cropland, Feb-23

E. coli, composting method kills in manure, Aug-20

Everglades Agro-Hydrology Model, Aug-16

Exotic Newcastle disease, vaccine for, Oct-20

Eye health, nutrition linked to, Aug-4

F-L

Falcata alfalfa, benefits of to forage and soil, Oct-8

FarmSuite, software package aids farmers, Oct-18

Feedlot, experimental, monitoring runoff from, Jul-10

Fire ants, biological control of, Feb-20, May-16

Flavonoids, new database of, Mar-6

Flood irrigation, effect of on stream, meadow, Nov-16

Flora and fauna, inventory of at BARC, Oct-2

Food animal research meets consumers' needs, Apr-2

Food safety

- history of ARS research on, Nov-4
- milk-based protective coating for foods, Jun-23
- new way to analyze pesticide residue, Jul-9
- training wasps to detect mycotoxins, May-23

Forage, salt-tolerant, Mar-23

Formosan subterranean termites, control of, Jul-2, 4

Forum: 50 Years and Counting, Nov-2

Forum: Agriculture and Wildlife—More Than Peacefully Coexistent, Oct-2

Forum: Banking on Weed Control, Aug-2

Forum: Dietary Guidelines: Expert Advice for Healthy Eating, Mar-2

Forum: Efforts To Protect Water Quality From Agricultural Runoff, Dec-2

Forum: Food Animal Production: Combining Traditional Practices and Modern Tools, Apr-2

Forum: Investigating Invasives: It Takes a Team, Sep-2

Forum: Is Your Health What You Eat? May-2

Forum: Lessons From a Decade of Genetically Engineered Crops, Jan-2

Forum: Operation Full Stop in Full Swing, Jul-2

Forum: Trout Research Makes a Splash! Jun-2

Forum: Winning the Weevil War: Beating a \$22 Billion Bug, Feb-2

Frogs

- cause of malformations in, Jan-20
- effects of pesticides on, Oct-12

Fruit breeding, Oct-4

Fungi, collection of those that fight insect pests, Apr-8

Fungicide

- controlling blue mold with yeast instead of, Aug-17
- cultivars reduce need for chemical-based, Aug-11
- iodine-based, for *Fusarium* control, Jan-19

Fungus

- enzyme from, prevents leaf spot disease, May-14
- Paecilomyces fumosoroseus* as insecticide, Aug-22

Genes for calcium accumulation in potatoes, Mar-18

Genetic engineering

- altered *Ultrapetala* gene in thale cress, May-12
- of commercial crops, Jan-2
- of cyanobacteria to stop catfish off-flavors, Mar-15

Genetic markers Jan-23, Aug-14

Genetics

- ARS research in, Nov-4
- co-dominant interpretation in beans, May-4
- dwarfing gene in apples, Nov-18
- of grapevines, Sep-16
- of trout, Jun-2, 4
- of *X. fastidiosa*, Sep-2, 16, 17

Genomic sequencing

- identifies avian virus in turkeys, Nov-23
- of microbes that cause cattle disease, Apr-19
- value to humans of, Jun-23

Germplasm

- animal and aquaculture collection started, Feb-12
- ARS efforts to preserve, Mar-23, Jun-8, 20
- exploration and collections, Nov-4
- seed storage, Feb-12

Germplasm Resources Information Network, Jun-20

Glassy-winged sharpshooter, control of, Sep-2, 16, 17

Global positioning system in agriculture, Jun-17

Grain, stored, Insector probe monitor for, Jul-12

Grain-based diets for trout, Jun-2, 4

Grapevines, controlling Pierce's disease in, Sep-2, 16

Grasshoppers, device monitors populations of, Apr-23

Ground beetles, *Bt* corn's effect on, Jan-4

Gypsy moth, GYPCHEK for control of, Oct-2, 12

Hairy vetch as alternative to plastic mulch, Jul-14

Human nutrition

- 50 years of ARS research on, Nov-4
- barley, oats, health benefits from eating, May-8
- benefits of drinking tea, Sep-10
- bone density, Feb-23, Mar-8, Sep-19
- cognitive function and, Jan-11, Dec-15
- Dietary Guidelines and, Mar-2
- dietary needs of various communities, Apr-16
- eye health and, Aug-4
- failure to thrive and, Dec-15

flavonoid database, Mar-6
heart disease in American Indians, Jan-11
high-meat diets, Apr-23, Nov-23
in Hispanic groups, Apr-20
in teens, May-23 Jul-23
iron bioavailability, Jan-17, Apr-14, May-15, Jul-23
Mobile Nutrition Research Laboratory, Jan-11
nutrient database uses Palm OS, Mar-4
obesity in Hispanic children, Jun-16
osteoporosis and sulfur-containing proteins, Mar-8
phytonutrients, health benefits of, May-2
resistance training and low-protein diets, Feb-23
vitamin A's role in immune response, Mar-10
vitamin, mineral supplements, Jan-11
vitamin K and bone density in women, Sep-19
zinc supplements in adolescents, Jan-11
Z-trim replaces fat in processed foods, Aug-23
Indianmeal moth, behavioral studies of, May-20
Insecticides, new grain monitor reduces use of, Jul-12
Insects
 beneficial, assay predicts fertility of, Jun-11
 Insector probe system counts in grain, Jul-12
 servosphere tests attractants for, Feb-18
Irrigation, Jul-17, Nov-4, Nov-16
Lutein, high bioavailability of from eggs, Aug-4

M-R

Management Zone Analyst software, Aug-17
Mannitol, using bacteria to make, Mar-7
Manure
 poultry, conversion of to activated carbons, Aug-23
 sanitizing and managing, Aug-20, Nov-20
Methyl bromide alternatives, Feb-15, Jun-23
Milk, protective film made from proteins in, Jun-23
Moon Cake, ARS giant vegetable soybean, Sep-8
Mosquito, *Culex*, baculovirus CuniNPV kills, Oct-23
MSEA, Nov-4
Mulch
 colored, crops' qualities enhanced by, Sep-14
 plastic, increases pesticide levels in runoff, Jul-14
 vegetative, reduces runoff, Jul-14
National Agricultural Library, plant expedition photos at, Jun-18
National Animal Germplasm Program, Feb-12, Mar-23
National Arboretum, Jun-12
National Bonsai and Penjing Museum, Jun-12
National Center for Cool and Cold Water Aquaculture, Jun-4
National Center for Genetic Resources Preservation, Feb-12
National Clonal Germplasm Repository for Fruit and Nut Crops, Jun-8
National Nutrient Database for Standard Reference
 downloadable PC version of, Oct-23
 portable version of, Mar-4
National Plant Germplasm System, Jun-20, Jul-23
Natural resources conservation, Nov-4
Nematodes, *Steinernema*, as fly biocontrols, Nov-20
Nutrient databases, upgrades to, Mar-5
Oats, health benefits of eating, May-8
Operation Full Stop, success of, Jul-2, 4
Orchids, caffeine controls slugs, snails on, May-23
PAM, polyacrylamide, as erosion control, Nov-4
Peanuts
 computer programs manage production of, Oct-18
 screening for allergens in, Jan-23
 two new cultivars resist disease, spoilage, Aug-11
Pearl millet, new strain of, Feb-19
Pest control,
 areawide, for termite control, Jul-2, 4
 boll weevil eradication program, Feb-2, 4

eradication, Nov-4
Insector probe for use in stored grain, Jul-12
Paecilomyces fumosoroseus fungus as, Aug-22
radio wave heating for in produce, Feb-15
Pesticides
 computer model predicts movement of, Jul-14
 effects of on frogs, Oct-12
 new way to analyze foods for residue of, Jul-9
 reduced in boll weevil program, Feb-2, 4
 use of at BARC plummets, Oct-2, 12
Phorid flies
 for fire ant control, Feb-20
 geographic information system tracks, May-16
Phosphorus, replacing, managing in soil, Jan-16
Phytonutrient requirements, databases, May-2
Plants
 biological clock protects, regulates, Apr-11
 new corn varieties by traditional breeding, Aug-18
 seed yield slows as temperature rises, Aug-23
 systemic acquired resistance in, Dec-8
 varieties, efforts to safeguard, Jun-20
Plum pox virus, real-time PCR test for, Oct-11
Potato Research Worksite, Jul-20
Potatoes
 activating defenses in with salicylic acid, Dec-8
 dormancy, wound healing in, Jul-20
 high calcium in improves quality, Mar-18
 six new varieties from ARS, Jan-8
Poultry
 identifying avian metapneumovirus in, Nov-23
 litter, conversion of to activated carbons, Aug-23
 test for avian influenza in, Feb-9
 vaccine for exotic Newcastle disease in, Oct-20
Precision agriculture
 aerial field photos sent via wireless network, Jun-17
 computer model maps management zones, Aug-17
QuEChERS method analyzes pesticide residue, Jul-9
Rangeland, effects of grazing on after wildfire, Mar-20
Raspberry, recent releases of, Oct-4
Red clover, gene from inserted in alfalfa, Dec-20
Remote sensing, May-16, Oct-23
Rootstocks, three better citrus, Dec-11

S-Z

Safflower, hair gel made from soapstock of, Sep-19
Salmonella
 composting method can kill in manure, Aug-20
 vaccine reduces shedding of by chickens, May-7
Salt-tolerant plants, Jan-22
Scale insects, monitoring, identifying, Dec-18
ScaleNet, full inventory of scale insects, Dec-18
Sediment
 total maximum daily loads of, Dec-12
 use of acoustics to monitor flow of, Oct-22
Seeds, high temperatures cut productivity of, Aug-23
Sheep grazing and weeds after wildfire, Mar-20
Sheep, hair-breeds efficient for meat production, Apr-7
Silage, reducing protein loss in, Dec-20
Silverleaf whitefly, fungus as biocontrol for, Aug-22
Skunk vine, *Paederia foetida*, biocontrol of, Oct-16
Snap beans, vitamin C and ozone tolerance in, Jan-7
Sock Saver delivers liquid oxygen to catfish, Aug-8
Soil
 beneficial microorganisms in, Jul-23
 benefits of strip tillage to, May-22
 compost remediates nutrient-deficient, Aug-20
 computer model development, Nov-4
 conservation buffers help to clean, Dec-4
 electrical conductivity of and herbicide use, Aug-14
 erosion of, Nov-4, Dec-12

measuring moisture, nitrogen, carbon in, Aug-23
nutrient loss, curbing with wood chips, Feb-23
Soybeans
 ferritin in is highly bioavailable, Jan-17
 first giant vegetable variety of, Sep-8
 hair gel made from soapstock of, Sep-19
 photos of historical expedition to collect, Jun-18
Stable flies, movement and control of, Nov-20
Strawberry, two new cultivars of, Oct-4
Sugar beets, *Cercospora* infection in, May-14
Sugarcane
 breeding new varieties of, Sep-5
 hot liming benefits producers of, Sep-4
Sunflowers, spread made from, Apr-23
Sustainable agriculture, Oct-2, 12, Dec-4
Sweetpotato weevils, irradiation sterilizes, Apr-22
Tarnished plant bug, wasp as biocontrol for, May-11
Tea, bioactivity of compounds in, Sep-10
Technology transfer, Nov-4
Termites
 naphthalenic termiticide, Jun-23
 success of Operation Full Stop, Jul-2, 4
Test
 for avian influenza, Feb-9
 for plum pox virus uses real-time PCR, Oct-11
Textiles, new tandem spinning system for, Mar-23
Thale cress, altered petal gene in, May-12
Trout, genetics and breeding studies of, Jun-2, 4
Turkeys, avian metapneumovirus identified in, Nov-23
USDA honor awards for preventing spread of pest, pathogen, Sep-16
USDA Human Nutrition Research Center on Aging, Aug-4
Variety and cultivar development, Nov-4
Vegetable oil to clean contaminated aquifers, Jan-23
Viruses, for fire ant control, Feb-20
Vitamin
 A, influence of on immune system, Mar-10
 B12, deficiency of in Hispanic elderly, Apr-20
 C and ozone tolerance in snap beans, Jan-7
 C and eye health, Aug-4
 D supplements and bone density, Feb-23
 D2, metabolite of, could fight cancer, Jul-18
 D3 tested as a way to tenderize beef, Jul-18
 E and eye health, Aug-4
 K and bone mineral density in women, Sep-19
Wasps
 as biocontrol against tarnished plant bug, May-11
 training of to detect foodborne mycotoxins, May-23
Water management, improving in South Florida agricultural areas, Aug-16
Watermelon, citrulline amino acid in rinds of, Sep-19
Water quality, Oct-22, Dec-2, 4, 12
Weeds
 ARS collection of seeds from, Aug-12
 preventive approach to managing, Aug-2
 seed banks, ecology and distribution of, Aug-14
 seed dormancy, Aug-12, 14
 soil microbes curb growth of, Jul-23
 WEEDSITE computer program manages, Aug-14
Wheat, gene inhibition for salt-tolerance in, Jan-22
Wildfires, grazing's effect on rangeland after, Mar-20
Wildlife
 artificial insemination boosts numbers of, Oct-12
 diversity of at BARC, Oct-2, 12
Wood, naphthalenic compounds may protect from fungal decay, Jun-23
Xylella fastidiosa, efforts to control, Sep-2, 16, 17
Yellow head disease, as fire ant biocontrol, Feb-20
Z-trim, high-fiber fat replacement, Aug-23
